

THE MATLAB QUEST

Compete in the event to become the best in the exciting world of **Matlab**. This Matlab quest is giving you an opportunity to apply your Matlab coding skills to solve the different real life problems from the field of science and technology.

At first level there will be a screening test for all the participants in which the very basic questions will be asked. 2nd level will be for mini algorithm making and testing. The top teams will go to next final level on the basis of score. Final round will consist Rapid-fire, Buzzer round and one long problem. Highest scorer will be the winner.

Rules and Regulations: -

- Team of max. 3 members and individuals are also allowed to participate.
- Identity cards issued by the respective colleges are mandatory for the event.
- We will provide PC with matlab software installed for coding.
- No internet connection will be provided during the competition and using of mobile phone during the competition will not be allowed.
- Team will be disqualified for using any unfair means and decision will be final and binding.
- Results will be announced on the final day after marking.

Marking Scheme:

- For first level only MCQ will be asked and no negative marking.
- For 2nd & final round
 - Marks will be awarded on the basis of desired output, compactness of the code, completion time and there will be step marking also.
 - For Rapid Fire and Buzzer round in final: marks will be awarded depending on the number of answers.

Certification Policy:

- Certificate of participation will be provided to the every participant of the team. The top two teams will be awarded with the certification of merit and the prize money.
